
WORK AT THE INDUSTRIAL SCHOOL.

How Charges of the State Are Given Useful Instruction.

To the Editor of the Free Press:

Being interested in all public school work we noticed in your columns a description of the papier mache maps, a feature of the public school work in Burlington. We would be pleased to say to the teachers and Free Press representatives that we too have found this a novel and instructive way of making maps, as it has been in use in the Vermont Industrial School for about a year. It was introduced by one of the teachers who saw an article in the November "Popular Educator" of 1894, by Emma G. Goodwin of Worcester, Mass., who gave an article on first year geography, for fourth grade work.

Very respectfully,

**VERMONT INDUSTRIAL SCHOOL.
Vergennes, Vt., Nov. 29, 1897.**
